

CHRISOFIX®

*The flexi-fix healer*

# High-runner products

## Chrisofix®

Chrisofix products are **CE-marked** and equipped with **EAN-UDI** identifications, as such ready to be sold globally, based on worldwide accepted standards. Furthermore, all our products are documented, **registered**, and approved for sale in Europe, conforming to the requirements of the latest European Medical Device Regulation, or **MDR**.

We can ensure flexible pricing, stable, high volume deliveries from our European manufacturing plant and a top-segment positioned product range.

## Products

Based on our patented solution, several years of product development, and all confirmed by the responses from diverse clinical / hospital experts, demonstrated by relevant patient experiences, Chrisofix® orthoses can provide the best if not the best unique solution for an optimal immobilisation.

## Technology

A patented product providing stable **circular fixation**, perfect fitting, parallel ensuring **comfortable** user experience with **quick application**, by also fulfilling both **adjustability** and reusability requirements. Chrisofix flexi-fix healer for efficient treatment and smart prevention.

CHRISOFIX®

The flexi-fix healer

## Finger splints & metacarpal region

Finger splint (DIP+PIP) -  
Malleable

## Why Chrisofix® ?

- ensures a safer **stable semicircular or circular fixation**,
- can be **adjusted and re-adjusted** within one minute, without water or heat,
- can provide more **efficient and targeted immobilisation** than usual fixation products,
- can offer **cost efficiency** both for users as well as for hospitals (quick usage),
- can allow more **convenient daily hygiene** and an earlier start of physiotherapy,
- can replace and **eliminate most of the thermoplastic fixations**,
- are **light and comfortable** similarly to the usual splints,
- can be re-adjusted and **reused by several patients** after disinfection and exchange of the liner.
